PRODUCT
INFORMATION

ROBERTS® 10" Carpet Shears are a must-have for professional carpet installation and repair. Manufactured from high-quality carbon steel for maximum durability, and with ground blades to ensure precision cuts, these shears deliver professional quality. The 10" blades cut material smoothly without jamming. They're ideal to use for in-between areas like staircases and upholstery work where a knife may not easily fit, great for cutting thick carpet padding, and for binding and surging area rugs. Designed with extra-wide handle openings, they are comfortable for large hands. ROBERTS 10" Carpet Shears are made in the USA.
