HIGH-PERFORMANCE MULTIPURPOSE

Residential & Commercial Carpet and Felt-Backed Sheet Vinyl

Powered by Microban® for superior mold and mildew protection.

1. DESCRIPTION

ROBERTS® 3300 HIGH-PERFORMANCE MULTIPURPOSE is a high-solids adhesive formula for the installation of hard-to-bond commercial carpet and most types of felt-backed resilient floor coverings. It provides an aggressive up-front grab for reduced bubbling and curling.

Features and Benefits

- High-solids content (70-73%) for the most demanding installations
- Moisture control up to 8 lbs. MVER and 85% RH
- Repositionable with excellent re-bond properties
- Coverage up to 180 ft²/gal
- Powered by Microban® for superior mold and mildew protection

3. INSTRUCTIONS

Limitations

- For interior installations only
- Do not use this adhesive for pure vinyl or vinyl-backed product
- Not recommended for finished cork having a wear surface or vinyl backing
- Not recommended for cork to be installed as the final flooring surface

Preparation

Subfloors must be structurally sound, dry, smooth, flat ($\leq 3/16"$ within 10'), level and free of excess moisture/alkali and all contaminants (oil, debris, paint, sealers, adhesive residue, etc.) that may inhibit the bond of the adhesive or the performance of the flooring and its installation. All substrate cracks, chips, holes, joints, high spots and irregularities must be adequately repaired. Patching compounds must be suitable for the use application, cement-based and polymer-modified, and applied according to the manufacturer's instructions.

Installation

Materials and area temperature must be between 65–95°F with a maximum RH of 65% for 48 hours before and during installation, as well as for 72 hours afterward. Large temperature or humidity increases or decreases can affect the flooring and performance of the installation. Lift a corner periodically to ensure 100% coverage of adhesive to the floor backing and the substrate to ensure a void-free bond. Spread adhesive uniformly. Adhesive ridges should be of sufficient height to achieve full coverage of the substrate and the back of the flooring. Place flooring into the adhesive while the adhesive is still fresh.

Clean-up

Fresh adhesive – warm, soapy water on a clean cloth.

Dried adhesive – use mineral spirits sparingly with a clean, white cotton cloth. DO NOT POUR DIRECTLY ONTO FLOORING.
