

Step 1:

Attach fence to center of base at location screws are installed.

Step 2:

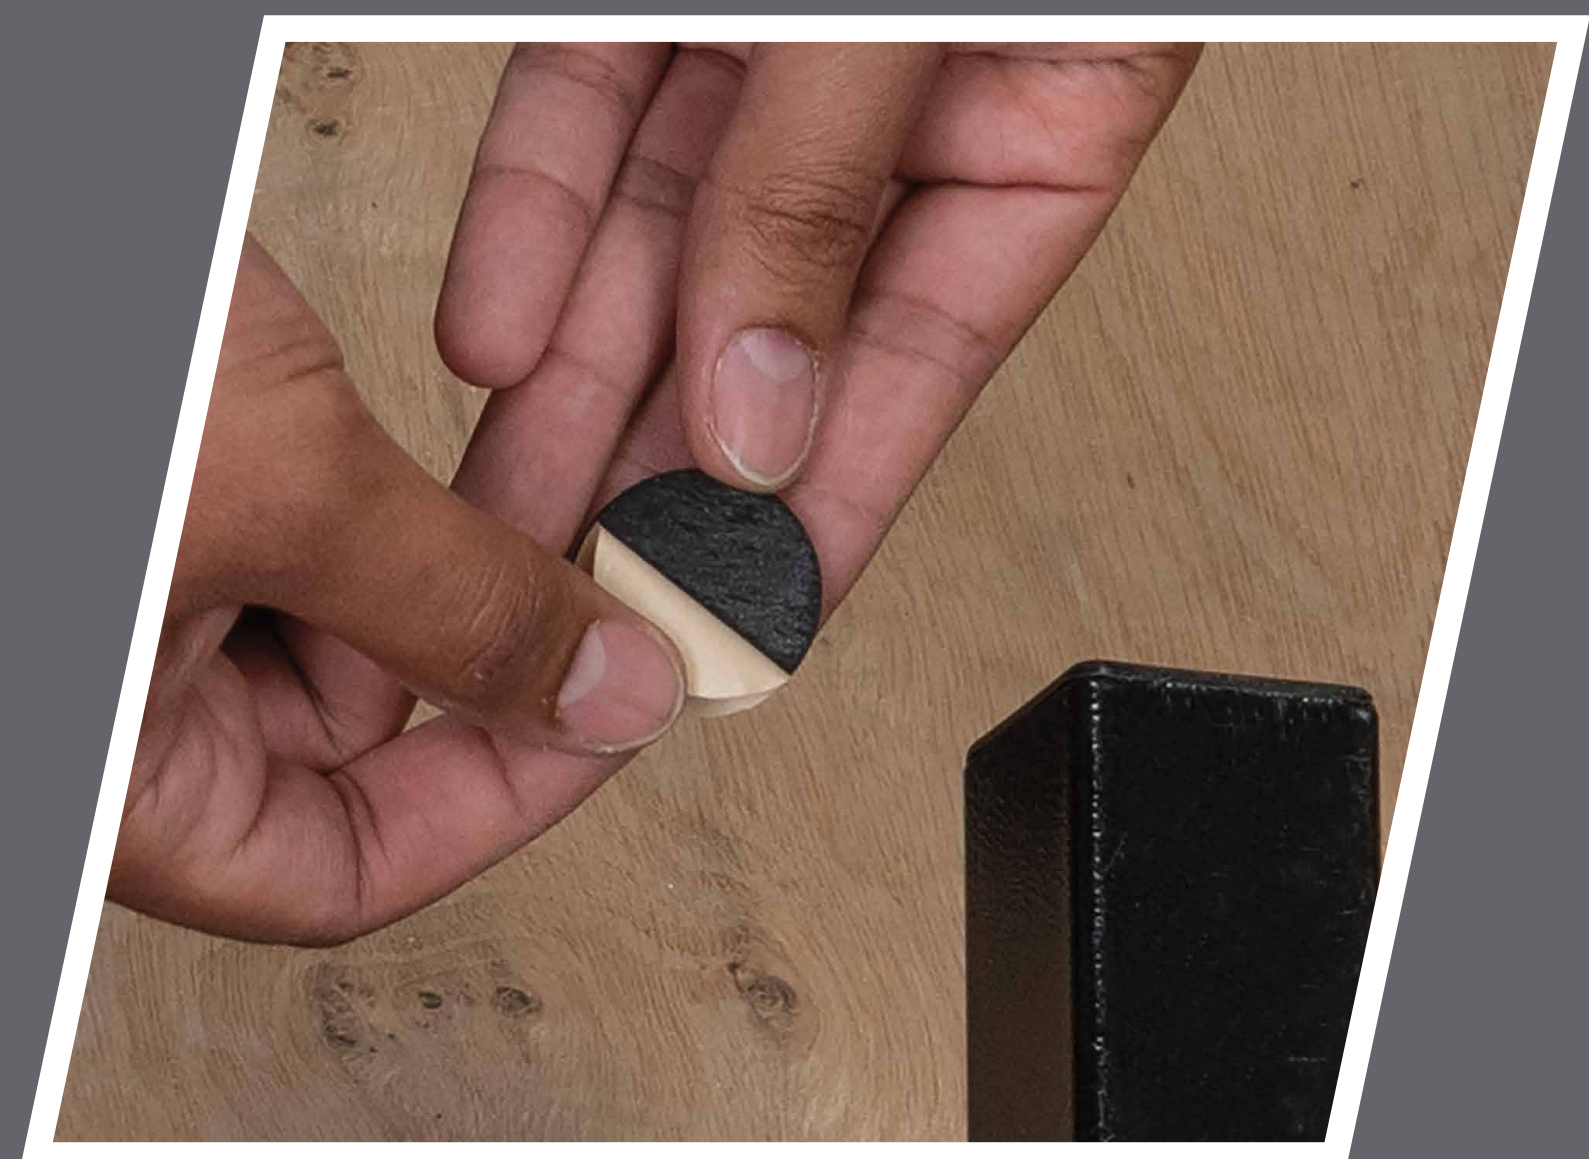

Attach handle to the cutting blade with the supplied screws, washers, and nuts.

Step 3:

Attach the blade to the cutter base

- Remove the locknut from the base and slide the bolt out just enough to release one of the plastic spacers from the underside of the base.
- Align the blade hole with the bolt and hole in the base.
- Replace the spacer and bolt, tighten locknut.

Step 4:

Place the 4 round self-stick felt pads on the bottom of the base.

Tools needed for assembly (not included):
11/16" and 3/8" wrench and Philips Screwdriver
