

12" Multi-Floor Cutter

for Laminate and Vinyl Floors

10-48

LEVERAGE

Long handle for more leverage and cutting ability

NON-SPLITTING

The blunt blade prevents laminate planks from splitting

TIME-SAVING

Dustless cutting speeds up cleaning time after installation

LEVEL

V support keeps plank level while cutting

PRECISE

Wide-board guide ensures straight cuts

DURABLE

Heavy-duty frame is durable for long life

The Brutus 12" Flooring Cutter is a blunt blade tool that quickly cuts end pieces to be covered with base molding. Made with a heavy-duty steel frame and a zinc-plated carbon steel blade, this cutter rips through flooring with a powerful push of the handle. The blunt, non-sharp blade prevents laminate from splitting. The compact design makes this cutter easy to transport from job-to-job or room-to-room. This cutter will not produce dust and may be safely used indoors without compromising air quality. This saves installers the time it takes to walk outside for every cut. This cutter will effectively cut laminate flooring up to 12" wide and 10 mm thick, and vinyl planks up to 12" wide and 4 mm thick.
