

Wood, Laminate & Vinyl Putty

USE & CARE INSTRUCTIONS

INSTRUCTIONS FOR USE

- Surface area should be clean and free of debris.
- Identify the color formula that best matches your repair.
- Knead the tube thoroughly for at least 20 seconds before use.
- Cut tip to desired bead size and apply the filler evenly.
- Use a putty knife to distribute into gaps, nicks and scratches. Wipe off excess with a damp rag.
- Do not allow excess filler to dry onto surrounding flooring.
- Allow to dry for at least 1 hour.

INSTRUCTIONS FOR CARE

Clean Up: Damp cloth while putty is still fresh.

Re-Hydrate Putty: Add a couple drops of water, mix, and add more water if needed until malleable.
